

SEFI Cooperation

SEFI enables numerous contacts to be made which can lead to practical cooperation schemes or long-term exchanges between individuals (professors, students and professional engineers), engineering institutions and corporate representatives from different European countries and worldwide.

SEFI maintains official relationships with UNESCO and the Council of Europe, as well as with many other engineering organisations all over the world.

SEFI is a founding member of EuroPACE, IACEE and of IFEEES. At the beginning of 2011, in cooperation with IFEEES, SEFI established the International Institute for Developing Engineering Academics (IIDEA).

SEFI is also a founding member of ENAEE, the European Network for the Accreditation of Engineering Education, which is the first example of a European Engineering Education Accreditation body.

SEFI Projects

SEFI participates in several European and international projects notably in the field of EU Lifelong Learning Programme.

SEFI Publications

→ The **European Journal of Engineering Education (EJEE)** is the SEFI bi-monthly scientific journal.

→ The **News@SEFI** is our monthly electronic newsletter.

→ The **SEFI Biennial Reports**

→ The **SEFI Cahiers and Documents**

→ The **Proceedings** of the SEFI Annual Conferences and workshops

→ Special publications and **position papers** on specific topics

The list of annual conferences, projects and publications can be found on www.sefi.be

SEFI receives the financial support of its corporate partners

Institutional Membership

Join SEFI

and become part of the largest network of higher engineering education actors in Europe.

SEFI AT A GLANCE

Founded in 1973 as non-profit international organisation, SEFI, the Société Européenne pour la Formation des Ingénieurs (*European Society or Engineering Education*), is the **largest network** of higher engineering education actors in Europe.

Our membership comprises key stakeholders in engineering education:

- Higher Education institutions and Academic staff
- Students and Student Associations
- Engineers and Professional societies
- Corporate representatives and companies

to whom we offer a **unique platform** for networking and developing concrete actions to improve and promote European engineering education.

AIM

To contribute to the development and to the improvement of engineering education and to enhancing the status of both engineering education and engineering professionals in society

OBJECTIVES

- To provide appropriate services and information about engineering education
- To improve communication and exchanges between teachers, researchers and students in the different European countries
- To develop cooperation between educational engineering institutions and establishments of higher technical education
- To promote cooperation between industry and those engaged in the process of engineering education
- To act as a link between our members and other societies or organisations
- To contribute to the recruitment of good students in engineering education
- To promote the development of the European dimension in higher engineering education

BENEFITS of Institutional Membership

By being member of SEFI, you are represented at European and international levels and have access to our network and to our activities

Institutional membership offers

- The participation in the political debate on higher engineering education and therefore, becoming **an actor in the discussions on higher engineering education policies in Europe**
- The **promotion of your institution** to a European and international audience through wider publicity for your events, your new courses and programmes
- The access to new innovative and best practice and to **knowledge sharing**
- The participation in **European frontier activities** in the SEFI Working Groups
- **Networking** opportunities for your staff
- The participation in our general **SEFI activities**
 - Standing Working Groups and Ad Hoc Task Forces
 - Annual Conferences (with reduced registration fees)
 - Deans Conventions
 - International Cooperation
 - International Projects
- The SEFI Publications, for free or with a special price reduction

All these services and activities are open to your entire academic staff

By joining SEFI, you will

- ✓ Position yourself and your institution at the European level!
- ✓ Start networking for better cooperation and sharing of good practice!
- ✓ Get access to the most recent engineering education information!
- ✓ Discuss and participate in specific issues in engineering higher education!

ACTIVITIES

SEFI Standing Working Groups

- **Attractiveness** of Engineering Education
- **Ethics** in Engineering Education
- **Gender** and Diversity
- Engineering Education **Research**
- **Curriculum** Development
- **Continuing** Engineering Education / Lifelong Learning
- Information and Communication **Technologies**
- **Physics** and **Mathematics** in Engineering Education

Workshops and seminars are regularly organised by the working groups on specific themes of engineering education and in the context of SEFI's priorities.

Participation in the working groups and Task Forces is reserved to the members of SEFI.

SEFI Ad Hoc Task Forces

- Cooperation with the **students**
- Quality Assurance and **Accreditation**
- **Sustainability** in Engineering Education
- **Bologna Process** and cooperation with EU institutions
- **University-business** cooperation
- Cooperation with **IGIP**
- Collaboration with **Africa**

SEFI Annual Conferences

The conferences represent a unique opportunity for the members and all those involved in Engineering Education to meet colleagues, exchange views and opinions and to establish new contacts. The themes of the Conferences reflect the interests of SEFI members.

SEFI Deans Conventions

Periodically, SEFI organises a special event for the Deans/Directors of European Higher Education Institutions in order to offer them a platform to discuss engineering education developments both at operational and policy levels which helps in formulating positions on key issues for onward transmission to other stakeholders and to the European Commission.
